ONLINE SAFETY & DIGITAL CITIZENSHIP POLICY — SUMMARY STATEMENT

Sculpture Dance Arts School

This policy sets out how we keep our whole school community safe, responsible, and respectful when using technology, the internet, and digital devices — both in school and outside of school hours.

What it covers

All use of computers, phones, tablets, social media, messaging apps, creative software, and email. It applies to students, staff, parents, and visitors.

Our key rules

- Use technology safely, respectfully, and legally — treat others online as you would in the studio or classroom.
- Protect your own personal information and creative work, and respect the privacy and work of others.
- Never share photos, videos, or recordings of students, staff, or performances without consent.
- Do not post or share anything that is harmful, offensive, or could damage someone's reputation or the school's name.
- If you see or experience something worrying online, tell a member of staff straight away.

What we do

We teach online safety and good digital habits, monitor use of school systems, and take all concerns seriously. Incidents will be investigated fairly, with support for those affected and appropriate action taken if rules are broken.

Full policy

Read the complete document alongside our Safeguarding, Cyberbullying, Photography, and Privacy Policies in the **Policies & Documents** section of our website.
